Technological Forecasting and Social Change
An International Journal

A 10-Volume Index of Authors, Subjects, "From My Perspective" Columns, and Book Reviews

Volume 61, Number 1—Volume 70, Number 9
1999–2003
Editor in Chief, Harold A. Linstone

Subject Index—Volumes 61–70

Achieving competitive capabilities in e-services, 69:721
Adoption of two related technologies, modelling the dependence between the times, 70:759
Advances in technological forecasting, a review of selected recent, 70:719
Advertising, extension under uncertainty, welfare implications of, 70:265
Africa, making the energy transition in, 68:173
Agent model, simulation of the spread of an infection in a population, 70:397
Agribusiness, strategic planning in public R&D organizations, Brazil and the US, 69:833
Agriculture and the environment, futures planning in France, 65:67
Air travel, a study of NASA's vision for its future, 69:173
Albright paper, letter exchange, 70:197
Analytic hierarchy process, future of hydrogen fueling systems, application of perspective-based scenario analysis using, 70:359
Artificial world modeling, 64:13
Ashby's Law of Requisite Variety, 64:23
Asia-Pacific region, long-term greenhouse gas emission scenarios, 63:207
Assumption drag
  common assumptions dangerous to our future, 62:97
  in economic development, 62:107, 62:115, 62:127
  famous bloopers, 62:91
  frequent cause of forecast failure, 62:91, 62:97, 62:107, 62:111, 62:115, 62:119, 62:121, 62:125, 62:131, 62:135, 62:147, 62:151
  why assumptions are a problem for futurists, 62:97
Australia, role in transfer of environmental technologies to China and South East Asia, 67:55
Australia, sustainable land management practices, overcoming constraints, 65:205
Auto industry
  make-buy decisions, 67:239
  regional globalization and economic integration in, 67:187
Auto industry in Taiwan and Mexico, industrialization, 66:87
Automated extraction, visualization of information for technological intelligence and forecasting and, 69:495
Automobile industry
  innovation in, 64:155
  innovations in auto safety design, 64:197
  in Japan, analysis of changes under growing complexity, 64:39

Bibliographic database, used to analyze trends in technology forecasting, 62:19
Bibliometrics, text mining using database tomography, 68:223
Bioethics, scenario on the future of biotechnology, 68:109
Biotechnological forecasting, growth area in technology forecasting, 62:29
Biotechnological inventions, construction of European patent system and assessment of industry views, 69:917
Biotechnology development, in Portugal, 66:59
Biotechnology firms, European, intellectual property rights management, 67:259
Biotechnology, scenario on the future of, 68:109
Biotechnology stakeholder panel, commercial use of GM crop technology, strategic planning and regulatory decision-making, 69:765

Biotechnology transfer, application to US forestry sector, effective absorption of trade-mediated, 70:545
Brazil, late industrializing economies and evidence of a new approach to technological change, 69:653
Brazil, strategic planning in R&D organizations for agribusiness, 69:833
Broadband services, optical networks and the future of, 69:741
Business ventures, the case of Daejon, Korea, characteristics of technology transfer in, 70:449

Capital investment, role of on change in wage share of skilled workers, 61:59
Carbon emissions, tenfold expansion of nuclear energy, 69:287
Carrying capacity, growth model allowing for increasing, 61:209
Catastrophes, challenge for long-term forecasting, 65:81
Cellphone, international adoption of two related technologies, modelling the dependence between the times, 70:759
Cellular automata, modeling of the emergence of innovations, 68:293
Cellular telephone industry, example of global adoption processes, 63:25
Chief Technology Officers (CTOs), historic decision making, 62:41
China and South East Asia, transfer of environmental technologies to, 67:55
Climate change, relation with structural shifts, 63:111
Coates
  honoring Joseph F., 69:537
  forecaster's forecaster, 69:565
  information technology and future employment, 69:539
  selected quotations from his TFSC columns, 69:573
  tribute to a master practitioner, 69:543
  the quiet strength of experience, a personal reminiscence, 69:555
Coevolution of firms and their knowledge, insights from the pharmaceutical industry, 70:687
Coin minting, effects of innovation on standardization, 64:171
Communities of practice (CoPs), modeling based on neural network concept, 64:71
Competitiveness, definitions and predictions, 62:127
Complex adaptive systems (CAS), (reports from conference)
  assessing organizational vitality, 64:101
  communities of practice (CoPs), modeling based on neural network concept, 64:71
  computer simulation technique to analyze social interactions in electronic-mediated groups, 64:13
  conference summary, 64:1
  genetic algorithms, connection with human innovation, 64:7
  learning, knowledge creation, and creativity, 64:85
  organization flexibility, model to measure, 64:23
  technology management under growing complexity, 64:39
  World Wide Web as a neural network, 64:55
Complex technological innovation, emerging patterns, 69:581
Complexity, forecasting the growth of change and, 69:377
Complexity science, implications for forecasting, 62:79
Computational models for innovative and creative design, 64:183
Computer-aided design (CAD) systems, effects of innovation on standardization, 64:171
Computer-integrated manufacturing (CIM), relationship of its success to learning capability, 69:53
Computer-related companies, study of flexibility/efficiency, 64:23

Computer power, cyberunions or faux unions? union prospects and, 69:567
Computer simulation
of organizational learning, 64:71
technique to analyze social interactions in electronic-mediated groups, 64:13
Computer simulations, importance in future technology forecasting, 62:63, 62:79
Computer software, *Loglet Lab*, 61:247, 61:273
Computer technologies, role of on change in wage share of skilled workers, 61:59
Computer upgrades, sales data used to verify choice-based diffusion model, 61:45
Conceptual design, teaching, 64:225
Conflict prevention (Perspective), 61:297
Consensus, importance of in futures planning (Perspective), 61:83
Consumer choice behavior, used to develop sales forecasting models, 61:45
Content analysis, description of responsibility for implementation, 68:207
Coping with contingency, the case of aquaculture in the Finnish Archipelago Sea, 69:107
Cosmic calendar, growth of complexity and change and forecasting of, 69:377
Creative design, *see* Innovation
Creativity
and learning in organizations, 64:85, 64:101
model, 64:241
Credentialing, certifying futurists (Perspective), 66:313
Crisis issue diagnosis, top managers' propensities, 69:803
Crisis management, clarifying attributes of organizational crisis, 67:77

Stochastic modeling, innovation races, 69:607
Stock market, technological forecasting applied to, 62:173
Strategic implementation, description of responsibility for implementation, 68:207
Strategic planning in public R&D organizations for agribusiness, Brazil and the US, 69:833
Strategy, a Japanese view of technology forecasting/foresight methods for decision systems and, 70:231
Structural equation model, predicting technology commercialization success index (TCSI) using, 70:885
Structural Shifts, relation with climate change, 63:111
Subcontracting, auto industry, 67:239
Sulfur dioxide emissions scenarios, 65:167
Sulphur hexafluoride emissions, 63:313
Supplier as innovator, auto industry make-buy decisions, 67:239

Supply chain, imbalance between environmental impact and economic value, 65:281
Sustainability, the role of forecasting, 70:21
Sustainable development, 63:111, 63:137
Sustainable land management practices in Australia, overcoming constraints, 65:205
Symposium report, "Judgmental Inputs to the Forecasting Process" (November 1998, London), 61:75
Systematic innovation methods, better technology forecasting using, 70:779

Taiwan, auto industry, industrialization, 66:87
Taiwan machinery industry, time series data, 67:291
Taiwan's machinery industry, forecast of development trends, 69:781
Technical change, determinants of in machine tool industry, 61:25
Technoeconomic systems, nonlinear dynamics of, an informational interpretation, 69:317
Technolabor homeostasis, hierarchical impacts of the length of technology waves: An analysis of, 68:81
Technological capacity, widening gap between countries, 62:219
Technological change, a comparison of insights from a neo-classical and an evolutionary perspective, 68:151
Technological change, labor markets, and 'low-skill, low-technology traps', 69:885
Technological change, making the energy transition in rural East Africa, 68:173
Technological evolution, DRAMs as model organisms for study of, 69:243
Technological forecasting
  future of the discipline, 62:1, 62:29, 62:33, 62:37, 62:51, 62:63
  history of the discipline, 62:1, 62:9, 62:13, 62:19, 62:29, 62:33, 62:37, 62:41
Technological forecasting, history and future of, 67:1
Technological Forecasting and Social Change, history of the journal, 62:1
Technological generalizations and leitbilder, anticipation of technological opportunities 69:625
Technological intelligence and forecasting, using automated extraction and visualization of information, 69:495
Technological partners, selecting, 67:221
Technological substitution, analysis of the Lotka-Volterra competition equations, 70:103
Technological threat and opportunity assessment, 61:215
Technological threats, analysis of, and opportunities in wireless data services, 70:1
Technology, personal attitudes in the assessment of the future of science and: A factor analysis approach, 68:131
Technology adoption timing, modeling across countries, 63:25
Technology and innovation policies, investigating future governance, Europe, 70:619
Technology and sustainable growth, towards a synthesis, 69:897
Technology assessment, impact of high-tech engineering research on energy consumption, 69:803
Technology assessment, in the twenty-first century (Perspective), 67:303
Technology assessment, innovation studies in the 21st century, 69:861
Technology commercialization success index (TCSI), structural equation model for predicting the, 70:885
Technology diffusion, value of information programs in accelerating, 61:13
Technology foresight, leveraging to create temporal advantage, 69:485
Technology foresight framework, commercial use of GM crop technology: identifying the drivers, 69:765
Technology-intensive organizations, study of crisis preparation in, 63:43
Technology management under growing complexity, modeling, 64:39

Technology maturity, R&D cluster quality measures and, 70:735
Technology monitoring, key to foresight, 62:143
Technology policy and innovation, special issue on biotechnology entrepreneurs and technology transfer, 66:59
economic development and occupational grouping, 66:111
evolution of technology strategy in opening markets, 66:75
geographical clusters and innovation diffusion, 66:31
incentives, infrastructure, and institutions for industrial development, 66:87
introduction, 66:1
knowledge for inclusive development, 66:1
patenting, R&D, and market structure, 66:47
Technology policy and innovation in the globalized learning economy, special issue on auto industry make-buy decisions, 67:239
Brazil, technological innovation in industry in, 67:203
globalization of industrial R&D, 67:143
innovation for the learning society, 67:115
intellectual property rights management, 67:259
regional globalization and economic integration, 67:187
service sector, impact of internationalization and technological change on, 67:159
technological partners, selecting, 67:221
Technology transfer, a framework with application to India for GHG (greenhouse gas) reduction, 69:405
Technology transfer, characteristics of venture business and entrepreneurs in Korea, 70:449
Technology transfer, environmental, to China and South East Asia, 67:55
Technology transfer, from public research to productive realm through entrepreneurship, 66:59
Technology trends, past technology trends and the future, 69:443
Technology upgrades, choice-based diffusion model for, 61:45
Technology waves, hierarchical impacts of, 68:81
Technometabolism, hierarchical impacts of the length of technology waves: An analysis of technolabor homeostasis, 68:81
Teleworking implementation, the organizational context of, 68:275
Temporal advantage, leveraging technology foresight to create, 69:485
Textile industry, regional globalization and economic integration in, 67:187
Thai industry, relationship between technical productivity and learning potentials, 69:89
Threats and fear, role in forecasting, 62:119
Time series, seasonal, forecasting model, 67:291
Tomography, text mining using database bibliometrics, 68:223
Top managers', propensities during crisis issue diagnosis, 69:803
Transport field, strategies for European innovation policy in the, 69:929
Trends important to forecasting, 62:111, 62:125, 62:131, 62:135
TRIZ, systematic innovation methods for better technology forecasting, 70:779
TRURL computer simulation technique to analyze interactions, 64:13
Twenty-first century predictions population trends, 67:19
technology assessment (Perspective), 67:303
Typewriter keyboard, effects of innovation on standardization, 64:171

Uncertainty, inadequacy of current forecasting methods in the face of, 62:147, 62:151
Unconventional wisdom, the future, 69:559
Union prospects, cyberunions or faux unions? computer power and, 69:567
United Kingdom, mobile telecommunications industry, 62:203
United Kingdom machine tools industry, adoption of computer technology, 66:31

United States
electricity consumption in, 61:235
increase in skilled labor market in, 61:59
US energy scenarios, meta-scenarios, pathways, and policy implications, 70:297
US forestry sector, trade-mediated biotechnology transfer and its effective absorption, 70:545
U.S. money supply, effect on global economic integration, 67:187
U.S. technology policy, globalization of industrial R&D, 67:143

Virginia case study, evaluating state cooperative technology programs, and comparative data from Illinois, 70:639
Visualization of information, technological intelligence and forecasting using automated extraction and, 69:495

Wage data, finding major determinants of occupational wage performance, 66:111
Waste management, product take-back, European mobile telephone pilot programs, 65:281
Web, impact on society, 65:265
Web-enabled marketing strategies, 64:55
Web site strategy, 64:55
Welfare implications, advertising and extension under uncertainty, 70:265
Wireless data services, analysing technological threats and opportunities in, 70:1
World system evolution, millennial learning process, power law behavior and, 70:819
World Wide Web as a neural network, 64:55

NORTH-HOLLAND

"From My Perspective" Columns Index—Volumes 61–70

Coates, J.F., *Being Helpful*, 61:83

Coates, J.F., *Scenario Planning*, 65:115

Coates, J.F., *Certifying Futurists*, 66:313

Coates, J.F., *A 21st Century Agenda for Technology Assessment*, 67:303

Coates, J.F., *Utopia–An Obsolete Concept*, 69:507

Coates, J.F., Coates, V.T., *Next Stages in Technology Assessment: Topics and Tools*, 70:187

Dror, Y., *Lucifer Smiles*, 69:431

Judge, A., *And After the Bombing Has Stopped?* 61:297

Koomey, J.G., *Avoiding "The Big Mistake" in Forecasting Technology Adoption*, 69:511

Linstone, H.A., *TF/TA: New driving forces*, 68:309

Linstone, H.A., *InfoMesa*, 69:309

Linstone, H.A., *Military Technology and Its Frustrations*, 69:759

Linstone, H.A., *The 21st Century: Everyman as Faust–Technology, Terrorism, and the Multiple Perspective Approach*, 70:283

Lohr, S., *A Time Out for Technophilia*, 69:205

Molitor, G.T.T., *Five Economic Activities Likely to Dominate the New Millennium: I. Introduction*, 64:271

Molitor, G.T.T., *Five Economic Activities Likely to Dominate the New Millennium: II The Leisure Era*, 65:239

Molitor, G.T.T., *Five Economic Activities Likely to Dominate the New Millennium: III Life Sciences Era*, 65:297

Molitor, G.T.T., *Five Economic Activities Likely to Dominate the New Millennium: IV Mega-Materials Era*, 66:121

Molitor, G.T.T., *Five Economic Activities Likely to Dominate the New Millennium: V New Atomic Age*, 70:473

doi:10.1016/S0040-1625(03)00124-0

Book Review Index—Volumes 61–70

Archibugi, D., and Michie, J., eds., *Technology, Globalisation and Economic Performance* (John A. Alic), 61:303

Archibugi, D., and Michie, J., eds., *Trade, Growth and Technical Change* (John A. Alic), 61:303

Armstrong D.T., *Principles of Forecasting. A Handbook for Researchers and Practi tioners* (Tessaleno Devezas), 69:313

Barnett, V., *Kondratiev and the Dynamics of Economic Development. Long Cycles and Industrial Growth in Historical Context* (Brian J.L. Berry), 61:311

Branscomb, L.M., Morse, K.P., and Roberts M.J., *Managing technical risk: Understanding private sector decision making on early stage technology-based projects. Prepared for U.S. Department of Commerce Economic Assessment Office, Advanced Technology Program, National Institute of Standards and Technology* (Fred Phillips), 69:217

Chacko, G.K., *Targeting Strategies for Continuous Competitiveness* (Luigi Toma), 62:267

Conceicao, P., Gibson, D., Heitor, M., and Shariq, S., *Science, technology, and innovation policy: Opportunities and challenges for the knowledge economy* (Nawaz Sharif), 69:103

De Greene, K.B., *Revolution Now! The New Scientific Basis* (T.C. Devezas), 70:579

Downey, G.L., *The Machine in Me: An Anthropologist Sits Among Computer Engineers* (Karol I. Pelc), 67:105

Dror, Y., *The Capacity to Govern: A Report to the Club of Rome* (Harold A. Linstone), 69:523

Etzkowitz, H., Kemelgor, C., and Uzzi, B., *Athena Unbound: The Advancement of Women in Science and Technology* (J.A. Alic), 69:953

Fey, V.R., and E.I. Rivin, *The Science of Innovation: A Managerial Overview of the TRIZ Methodology* (Harold A. Linstone), 64:115

Galtung, J., and Inayatullah, S., eds., *Macrohistory and Macrohistorians: Perspectives on Individual, Social, and Global Change* (R. Maria Saleth), 67:111

Gordon, T.J., and J.C. Glenn, *Factors Required for Successful Implementation of Futures Research in Decision Making* (Alan L. Porter), 66:323

Grübler, A., *Technology and Global Change* (Jim Dator), 62:259

Grupp, H., and Maital, S., *Managing new product development and innovation. A microeconomic toolbox* (Luigi Toma), 69:207

Inhaber, H., *Why Energy Conservation Fails* (Jim Skea), 70:489

James, J., and Elgar, E., *Technology, Globalization and Poverty* (Fred Y. Phillips), 70:493

Jin, D., *The Dynamics of Knowledge Regimes: Technology, Culture and National Competitiveness in the USA and Japan* (John W. Peterson), 69:955

Krause, P.H., *Proteus: Insights from 2020* (Harold A. Linstone), 69:519

Le Goc, M., *Development Techniques for International Technology Transfer* (Nawaz Sharif), 70:923

Lefebvre, L.A., Mason, R.M., and Khalil, T., eds., *Management of Technology: Sustain able Development and Eco-Efficiency* (Lew Goslin), 61:89

Linden, E., *Future in Plain Sight: Nine Clues to the Coming Instability* (Peter Bishop), 61:93

Linstone, H.A., *Decision Making for Technology Executives: Using Multiple Perspectives to Improve Performance* (Joseph F. Coates), 63:101

Michaelis, A.R., *The Scientific Temper: An Anthology of Stories on Matters of Science* (Harold A. Linstone), 70:195

Malecki, E.J., *Technology and Economic Development: The Dynamics of Local, Regional, and National Competitiveness* (R. Maria Saleth), 62:263

Modis, T., *An S-Shaped Trail to Wall Street: Survival of the Fittest Reigns at the Stock Market* (Harold A. Linstone), 63:373

Modis, T., *Predictions: 10 Years Later* (Harold A. Linstone), 70:497

Mowshowitz, A., *Virtual Organization: Toward a Theory of Societal Transformation Stimulated by Information Technology* (John W. Peterson), 70:575

Nakićenović N., Grübler, A., and McDonald, A., eds. *Global Energy Perspectives* (Lew N. Goslin), 61:307

Neumann, M., *The Rise and Fall of the Wealth of Nations: Long Waves in Economics and International Politics* (Brian J.L. Berry), 67:313

Park, J., and Roome, N., *The Ecology of the New Economy: Sustainable Transformation of Global Information, Communications and Electronics Industries* (Hans Gottinger), 70:193

Pearl, J., *Causality: Models, Reasoning, and Inference* (Steven Payson), 68:105

Phillips, F.Y., *Market-Oriented Technology Management* (Kish Sharma), 69:533

Rycroft, R.W., and Kash, D.E., *The Complexity Challenge: Technological Innovation for the 21st Century* (Harold A. Linstone), 63:379

Shell International 2001, *Energy Needs, Choices, and Possibilities, Scenarios to 2050* (Joseph F. Coates), 69:527

Sørensen K.H., and Williams R., *Shaping Technology, Guiding Policy: Concepts, Spaces, and Tools* (Vary Coates), 70:919

Steil, B., Victor, D.G., and Nelson, R.R., *Technological Innovation and Economic Performance* (Joseph P. Martino), 70:491

Swift, D.W., *Voyager Tales: Personal Views of the Grand Tour* (Jim Skea), 67:309

Thompson, J.M.T., *Visions of the Future: (1) Physics and Electronics (2) Astronomy and Earth Science (3) Chemistry and Life Science* (Joseph F. Coates), 69:437

Wenk, E., Jr., *The Double Helix: Technology and Democracy in the American Future* (Harold A. Linstone), 63:375

Williams, G.P., *Chaos Theory Tamed* (Brian J. L. Berry), 67:109

Zey, M.G., *Seizing the Future: The Dawn of the Macroindustrial Era* (Lewis N. Goslin), 67:317
